MY WORKS

This is the result of my work as long as I explore the world as a programmer and software developer.

Jenaka Company Profile

Jenaka Company Profile website combines modern design and functionality to showcase the companies professionalism. Featuring responsive layouts, dynamic content with Advanced Custom Fields, smooth animations, and email integration, it delivers an optimized user experience and digital presence.

Role

Front End Developer

Tech Stack

- Language : HTML, CSS, JS
- CMS : Wordpress (Custom Themes)
- Plugins : Advanced Custom Fields (ACF), Mailgun SMTP, Animated On Scroll (AOS)

Primagrindo Website Revamp

I revamped the **Primagrindo** website to enhance UX, professionally showcase their biogas products, and strengthen branding. Using WordPress with custom themes, ACF, WP SMTP, and AOS, I created a dynamic, engaging platform that elevated their online presence and highlighted their innovative biogas solutions.

Role

Front End Developer

Tech Stack

- Language : HTML, CSS, JS
- CMS : Wordpress (Custom Themes)
- Plugins : Advanced Custom Fields (ACF), WP SMTP, Animated On Scroll (AOS)

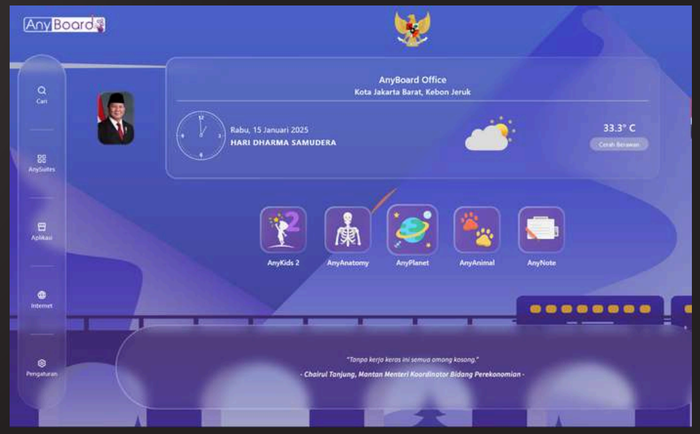
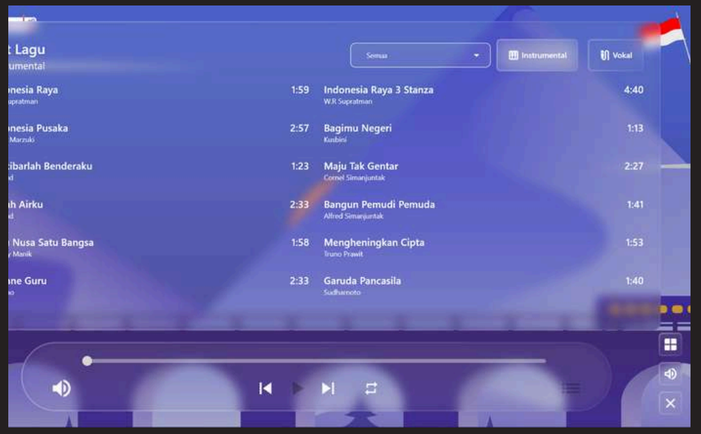
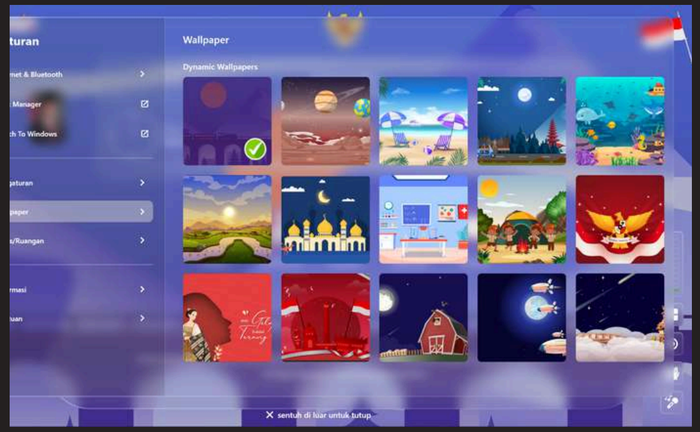
AnyHome - AnyBoard Desktop Launcher

AnyHome is a Windows application developed for AnyBoard, a digital whiteboard platform, using the Flutter framework. The app includes various features such as playing songs, and more. I focused on creating a user-friendly and functional application tailored to the interactive hardware, showcasing my ability to develop versatile solutions with Flutter for Windows.







Role

Programmer

Tech Stack

- Language : Dart
- Framework : Flutter (Windows)
- Tools & Libraries : Provider, Dio, HTTP, audioplayer, recorder, adhan, digitalclock, Rive, today_weather, Flutter_DotEnv, etc

AnyKids - AnyBoard Desktop App

AnyKids is a desktop application developed for AnyBoard, an interactive whiteboard platform. Built using Unity and programmed in C#, the application is designed to deliver an engaging and interactive experience for children.

Role
Programmer

Tech Stack

- Language : C#
- Game Engine : Unity
- Platform : Windows 10
- Development Environment : Unity Editor, Visual Studio Code
- Version Control : GitHub, Unity Version Control, Git LFS
- Design Tools : Adobe Illustrator

AnyMuslim - AnyBoard Desktop App

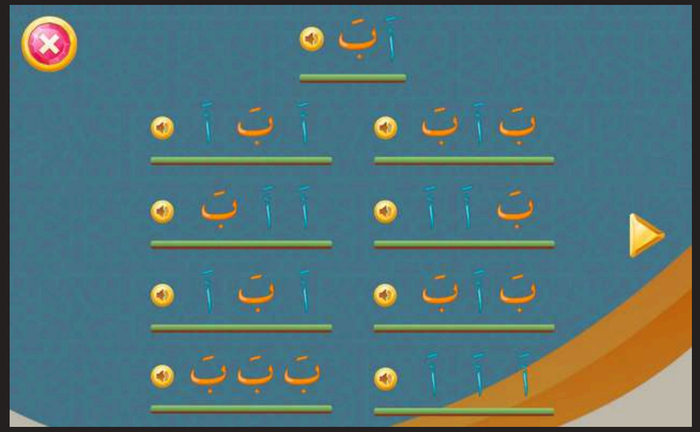
AnyMuslim is a desktop application developed for AnyBoard, an interactive whiteboard platform. Built using Unity and programmed in C#, the application is designed to deliver an engaging and interactive experience for muslim people.

Role

Programmer

Tech Stack

- Language : C#
- Game Engine : Unity
- Platform : Windows 10
- Development Environment : Unity Editor, Visual Studio Code
- Version Control : GitHub, Unity Version Control, Git LFS
- Design Tools : Adobe Illustrator



AnyAnalytics - Analytics for AnyBoard Device & App

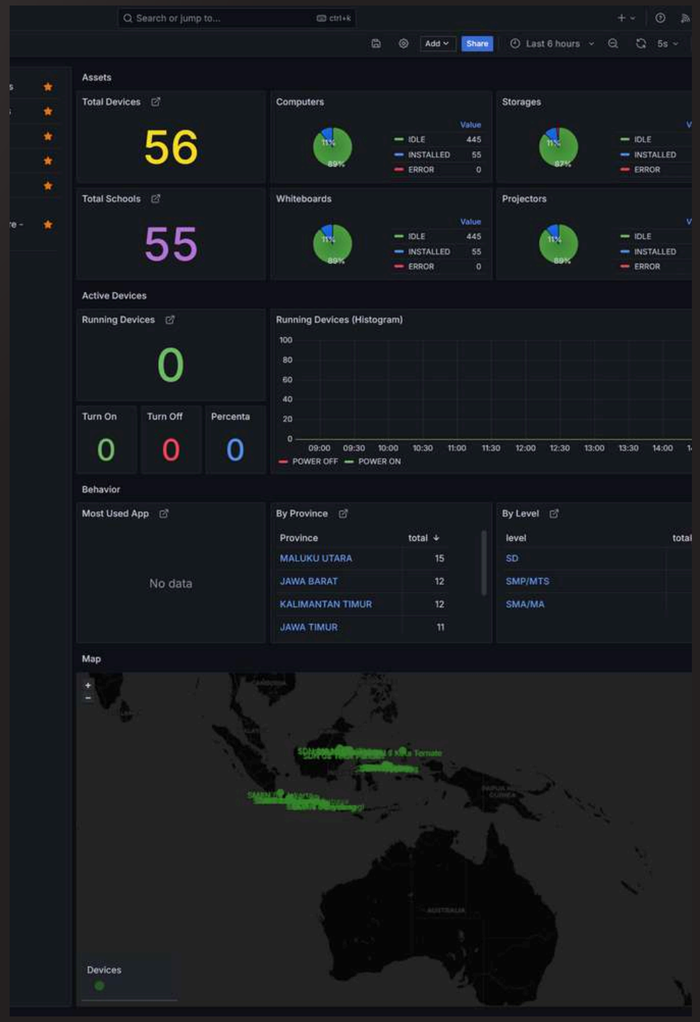
AnyAnalytics is a data analytics platform built for AnyBoard, utilizing Grafana to track device usage, app engagement, and other activities. Custom themes in Grafana and Postman API integration ensure seamless data visualization and reporting.

Role

Programmer

Tech Stack

- Analytics & Visualization : Grafana
- API Integration : Postman API
- Platform : AnyBoard
- Development Environment : Visual Studio
- Version Control : GitHub



GET IN TOUCH

I’d love to hear from you! Whether you have a question, want to discuss a project, or explore potential collaborations, feel free to reach out.
You can contact me through the form below or via email, and I’ll get back to you as soon as possible. Let’s create something amazing together!
